The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 recites the limitation "the state of control" in line 12. There is insufficient antecedent basis for this limitation in the claim.

3. Claim 6 recites the limitation "the state of control" in line 19. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. Claims 1, 6, Pione teaches information processing equipment [*Fig. 1*] comprising: an information storing means that records or reproduces data according to a plurality of power consumption modes [*15 of Fig. 1*]; and an information processing means that controls the information storing means with respect to at least recording or reproduction of the data [*Host 70 of Fig. 1*], characterized in that:

Allowable Subject Matter

7. Claims 2-5, 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
